About CTS

The CTS Electronics Group is a global manufacturer of automated systems for payments, document processing, cash recycling and deposits. The CTS companies design and manufacture high-quality peripherals with multiple options for different customer needs. Additionally, CTS produces software which is used to tune and enhance the performance of CTS systems in specific customer environments. Since 1980, extensive know-how, lean structure and flexibility have distinguished CTS as the market leader in banking and retail with over one million peripherals installed across five continents.

The Retail Link To The Bank

CS eXtra

SECURE RETAIL FRONT LINE AND BACK OFFICE CASH DEPOSIT SOLUTION

Easy access to cash is a risk for both employees and customers. Depositing cash in a robust safe right after receiving cash from the customer prevents risk of robbery and increases in-store security.

CSeXtra is an innovative and advanced technology solution to guarantee security and cash flow efficiency improving store cash management procedures.

Equipped with the CTS long edge validation module, this unique device can deposit banknotes easily into the safe in an innovative stacked security bag. Retailers can deposit banknotes directly on their premises thus saving time and eliminating typical mistakes in manual cash handling.

1] All the basic features for banknote processing and deposit are included in the CSeXtra plug and play unit which can be connected to existing workstations.

EXTENDEED CAPACITY & FLEXIBILITY

CSeXtra fits any standard desk as an under-the-counter solution. CSeXtra T has the same reduced footprint with double capacity to store up to 4,000 notes to which may need an extended deposit capacity while maintaining same performance of the standard version. Exclusive CTS Long Edge Validation Technology and Auto-sealing Stacked Bag are available on both solutions.

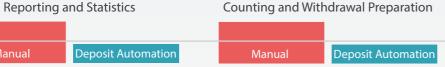

With its high capacity, up to 4,000 banknotes, CSeXtra meets various customer and business needs. Even in small shops where space is limited, its small size and footprint allows this unit to be placed under a counter or in a small back office. This broadens the number of retailers who may benefit from the enhanced features provided within this unique cash deposit solution.

Deposit automation eliminates human errors and typical mistakes made in daily reconciliation using spreadsheets or paper documents.

4000

2000

2] An optional configurable console which includes PC, touch display, printer and identification system combine to make *CSeXtra* the full-function cash deposit solution to streamline the cash flow from retail to bank.
